Updated Check, Envelope and Deposit Slip Information
May, 2018

We have had to increase our check, envelope and deposit slip prices due to our costs rising over the last 6 years. We have tried to keep the increases as small as possible.

The company that does our checks also did away with the **parchment colors**, so checks are now just available in **Herringbone**. This goes for both Pre-Printed and Blank Checks. They also did away with the premium colors for Blank Checks.

The new price list is available on our web site www.pcsai.com -> **Order Checks, Deposits, Etc -> Order Form and Prices.**

Here is a review of the Check styles we offer:

1. **Standard Mid Check** - This is the Check style that the **Computer Checkbook** program is expecting to print as a default. This Check is referred to as "Mid" because the actual check prints as part of the middle section with a check stub above and below it.
2. **Standard Top Check** - This Check style is often referred to as the **Quicken/QuickBooks** check format. The Check can be ordered with or without lines on the check face. This style can easily be selected as the default check format in the **Computer Checkbook** program. This Check is referred to as "Top" because the actual check prints as part of the top section with two check stubs below it.
3. **High Security Check** - This Check style has many features that make it very difficult to reproduce on a copier or scanner or to make alterations on the check itself. This Check Style can be ordered in either the "Mid" or the "Top" format.
4. **Blank Check Stock** - With the Blank Check Stock style, the **Computer Checkbook** program prints all the check data to the check including the **MICR** encoded bank routing number, account number and check number. This Check Style can be ordered in either the "Mid" or the "Top" format. In order to use this style of Check with **Computer Checkbook**, you must have purchased the optional **MICR Option**. If you print checks for many bank accounts or need to change bank accounts, the Blank Check style can save you a significant amount of money.

Here are a few notes that you might consider when placing your check, envelope or deposit slip order:

1. Before placing your check order, it is important to know how your printer requires you to stack the checks. Some printers require you to place the check face up and some printers require you to place them face down. You can order your checks to match your printer requirements. So when you order your checks, you can request either "**Face Up**" or "**Face Down**".
2. While most colors are available for all the different check styles, there are some exceptions. So please verify that the color you want is available for your style of check.
3. If you would like to enhance the look of your check, you can print "**Logos**", either standard or custom, at no additional cost.

If you have any questions regarding any of the items mentioned above, please do not hesitate to call us @ 1-941-896-9861.
